Re: Sensitive Species and Habitats within the Fernley Wildlife
Management Area, Fernley, Nevada.

Dear Mr. Neel:

Attached please find a copy of my information request form submitted to the Nevada Natural Heritage Program regarding sensitive species in the vicinity of the Eticam facility, located in Fernley, Nevada. In the response letter from Nevada Natural Heritage Program (also attached), that agency indicated that the wetlands in the area support various species of waterfowl and various raptors may occur in this area.

I am requesting that your department furnish me with any information at your disposal regarding waterfowl and raptor occurrences within this area. Also, if you could provide me with any literature regarding the status or history of the Fernley Wildlife Management Area. Thank you for your prompt attention to this matter.

Sincerely,
ECOLOGY AND ENVIRONMENT, INC.

Peter M. Geiger
Project Manager
